

REMARKS

This is the national phase of PCT/IB2004/003726 filed November 4, 2004, which claims priority to U.S. 60/517,584, filed November 5, 2003 and GB 0406296.4 filed March 19, 2004, the entire contents of which are incorporated. To conform with U.S.P.T.O practice, amendments to the specification and claims have been made. No new matter has been added. Heading titles were added. A summary of the invention was added based on the originally filed claims and specification and hence does not add new matter. In addition, a brief description of the figures was moved from the end of the specification (where it was located in the PCT) and moved up to before the detailed description of the invention. The original claims were cancelled and new claims written to remove most of the multiple dependencies. Two footnote reference numbers were removed and replaced with the actual reference citation. Finally, a typographical/spelling error was corrected.

In addition to this preliminary amendment, a marked up version and a clean copy of the specification (a substitute specification) with the amendments incorporated therein are included herewith.

The Examiner is invited to contact the undersigned if necessary to further the prosecution.

Respectfully submitted,
KENYON & KENYON LLP
